address: 621 General Paz St.
location: Rafaela, Santa Fe, Argentina

ABOUT ME

As a web application specialist, I focus on efficient software engineering and Python development, specializing in backend architecture. Skilled in Django and Flask frameworks for backend development and RESTful APIs creation. Experienced in database design for effective data management. Committed to staying updated on web development trends for innovative solutions. Strong problem-solving skills and dedication to excellence for adding value to projects and collaborating effectively.

WORK EXPERIENCE

- PYTHON BACKEND DEVELOPER

January 2021 - up to present | Self-employed/Freelancer

- Development of backend web applications using technologies such as Django, Flask and FastAPI.
- Database design and optimization to ensure efficient storage and rapid data retrieval.
- Creation of RESTful APIs to facilitate communication between the frontend and backend of the applications.
- Implementation of data mining and web scraping techniques for the extraction and analysis of data from various sources.
- Remote collaboration with clients to understand and meet their specific needs, ensuring the delivery of high-quality, results-oriented solutions.

SKILLS

- Python
- Django
- TypeScript
- Docker

EDUCATION

2010 - 2018 | UNIVERSIDAD CATÓLICA DE SANTIAGO DEL ESTERO,
Computer Engineering

CERTIFICATIONS
